KELSIE BLACKSTON

FULL STACK WEB DEVELOPER

PERSONAL SUMMARY

Full stack web developer based in Indiana with skills in problem solving, communication, and graphic design. A naturally inquisitive, lifelong learner that's always open to new, innovative ideas and perspectives. Experience in using HTML, CSS, JavaScript, React, Angular and SQL.

PROJECTS

MyFlix - React

Full Stack Development

- Server and client side movie application built with the MERN stack
- Users can register for accounts, view the movie list, and add movies to their favorites list

Meet App

Front-End Development

- A server less, progressive web application built with React
- Pulls information from a Google Calendar API
- Created using a test-driven development technique with Jest

WORK EXPERIENCE

Pricing Support Estimator

Deaconess Health System | October 2021 – Present

- Create pricing estimates for healthcare patients
